

# Aisle Airplane Wheelchair

## FEATURES

Wheelchair specially designed to be used inside airplanes

Created because of the petition and need of European airlines to move people inside Focker airplanes, which have the narrowest corridors

Its design was followed and approved by technicians and executives of a leading European airline

Made of high resistance polymers and steel

Includes basic and thigh safety belts

Front and rear handles

Customizable with serigraphy on backrest

“  
*Designed and manufactured specifically for the transport of users from the airport terminal to their seat inside the airplane*  
 ”
